

# 2013 Final Report on the Performance of the Northeast Multispecies (Groundfish) Fishery (May 2013 – April 2014) 2nd Edition

Please note: The first edition of this report was released on January 22, 2015. This second edition of the report is being issued to correct two identified concerns with the first edition. First, Table 27 reports (1) ex-vessel prices, (2) ACE lease prices, and (3) ratios of ACE lease prices to ex-vessel prices. In the first edition, ex-vessel prices were reported in dollars per landed pound, and ACE lease prices were reported in dollars per live pound, resulting in incorrect calculations for the ratios of ACE lease price to ex-vessel price. Table 27 has been corrected so that both ex-vessel and ACE lease prices are presented in dollars per live pound. In addition, in the first edition of the report, Table 43 reported mean per day values on groundfish trips, and Table 44 reported mean per day values on non-groundfish trips. Both of these tables have been corrected to present median (instead of mean) values per day. This correction was made to address the highly skewed distribution of per day values. The median value is a more appropriate summary statistic to represent the earnings of the groundfish fleet per day on both groundfish and non-groundfish trips.

## Northeast Fisheries Science Center Reference Documents

**This series is a secondary scientific series** designed to assure the long-term documentation and to enable the timely transmission of research results by Center and/or non-Center researchers, where such results bear upon the research mission of the Center (see the outside back cover for the mission statement). These documents receive internal scientific review, and most receive copy editing. The National Marine Fisheries Service does not endorse any proprietary material, process, or product mentioned in these documents.

All documents issued in this series since April 2001, and several documents issued prior to that date, have been copublished in both paper and electronic versions. To access the electronic version of a document in this series, go to <http://www.nefsc.noaa.gov/nefsc/publications/>. The electronic version is available in PDF format to permit printing of a paper copy directly from the Internet. If you do not have Internet access, or if a desired document is one of the pre-April 2001 documents available only in the paper version, you can obtain a paper copy by contacting the senior Center author of the desired document. Refer to the title page of the document for the senior Center author's name and mailing address. If there is no Center author, or if there is corporate (*i.e.*, non-individualized) authorship, then contact the Center's Woods Hole Laboratory Library (166 Water St., Woods Hole, MA 02543-1026).

**Information Quality Act Compliance:** In accordance with section 515 of Public Law 106-554, the Northeast Fisheries Science Center completed both technical and policy reviews for this report. These predissemination reviews are on file at the NEFSC Editorial Office.
